State the code no. ST160316TGC for this promotion. Limited to one entry per person and multiple entries will be totally disqualified.

Closing date: 30 Mar 2016

TGC® Works!

"I have been suffering from lower back pain and joint pain on my elbow for couple of months. After using TGC Plus Capsaicin for about a week, the pain has subsided. I will continue using this product."

Mdm Chia, 55,
Teck Whye (Singapore)

Joint pains may be caused by cartilage getting worn out over time. We need to replenish regularly our glucosamine to maintain healthy joints. Unfortunately, glucosamine cannot be found in our normal diet and as we age, our body is unable to synthesize enough glucosamine.

TGC® delivers a high concentration of glucosamine and capsaicin to the joints for relief of painful joints due to worn-out cartilage. Improvements usually noticeable after 2 to 4 weeks.
